Draft Amendment 4 to the Fishery Management Plan for Corals and Reef Associated Plants and Invertebrates of Puerto Rico and the U.S. Virgin Islands (public hearing dealing with seagrasses)*Proposed Action*

The Caribbean Fishery Management Council proposes: To modify the management of seagrass species included in the Corals and Reef Associated Plants and Invertebrates Fishery Management Plan. There are four alternatives proposed for this action:

Alternative 1: No Action. Do not modify the management of seagrass species listed in the Corals and Reef Associated Plants and Invertebrates Fishery Management Plan. Retain current management reference points or proxies for seagrass species.

Alternative 2: Prohibit the harvest in the U.S. Caribbean exclusive economic zone of seagrass species listed in the Corals and Reef Associated Plants and Invertebrates Fishery Management Plan.

Sub-Alternative 2(a): Prohibit harvest and establish an annual catch limit = 0 for seagrass species listed in the Corals and Reef Associated Plants and Invertebrates Fishery Management Plan.

Sub-Alternative 2(b): Prohibit harvest and establish an annual catch limit ≥ 1 lb. wet weight for the seagrass species listed in the Corals and Reef Associated Plants and Invertebrates Fishery Management Plan to account for harvest associated with educational or restoration purposes.

Alternative 3: Designate the seagrass species listed in the Corals and Reef

Associated Plants and Invertebrates Fishery Management Plan as Ecosystem Component species as defined in the Magnuson-Stevens Act National Standard 1 Guidelines.

Alternative 4: (Preferred) Remove all species of seagrass from the Corals and Reef Associated Plants and Invertebrates Fishery Management Plan

Scoping Meetings

Options for Island-Specific Fishery Management Plans (FMPs) in the U.S. Caribbean (scoping meeting)

Option 1—No Action

Do not modify the existing species-specific FMPs. NOAA Fisheries and the Caribbean Council would continue to manage federal fisheries in the U.S. Caribbean EEZ under the Spiny Lobster, Reef Fish, Coral, and Queen Conch FMPs.

Option 2—The Four Island FMP Approach

Create new island-specific FMPs for Puerto Rico, St. Croix, St. Thomas, and St. John. Under this option, the Caribbean Council and NOAA Fisheries would manage the EEZ resources under separate FMPs for each of these islands.

Option 3—The Three Island FMP Approach

Create three new island-specific FMPs for Puerto Rico, St. Croix and St. Thomas/St. John. The Caribbean Council and NOAA Fisheries would combine management of the St. Thomas and St. John EEZ resources. The St. Croix and Puerto Rico EEZ resources would be managed under separate FMPs.

Option 4—The Two Island FMP Approach—Puerto Rican Bank Approach

This option would allow the Caribbean Council and NOAA Fisheries to develop two island-specific FMPs. The Caribbean Council and NOAA Fisheries would combine management of the Puerto Rico, St. Thomas, and St. John EEZ resources but would manage the St. Croix EEZ resources under separate FMPs.

Special Accommodations

These meetings are physically accessible to people with disabilities. For more information or request for sign language interpretation and other auxiliary aids, please contact Mr. Miguel A. Rolón, Executive Director, Caribbean Fishery Management Council, 268 Muñoz Rivera Avenue, Suite 1108, San Juan, Puerto Rico, 00918–1920, telephone (787) 766–5926, at least five days prior to the meeting date.
