NOTICE OF PUBLIC HEARINGS**

The Caribbean Fishery Management Council (Council) will hold public hearings on the document that considers Amendments to the US Caribbean Reefish, Spiny Lobster and Corals and Reef Associated Plants and Invertebrates Fishery Management Plans: Timing of Accountability Measure-Based Closures. Specifically, the Council intends to receive public input on the following proposed management action:

Action 1: Modify the timing for the implementation of AM-based closures in the EEZ;

Alternative 1: No action. Continue AM-based closures resulting from an annual catch limit (ACL) overage beginning on December 31st of the closure year and extending backward into the year for the number of days necessary to achieve the required reduction in landings.

Preferred Alternative 2: Accountability measure-based closures resulting from an ACL overage will begin on September 30th of the closure year and would extend backward into the year for the number of days necessary to achieve the required reduction in landings. This closure start date would apply to all fishery management units (FMUs) for each of Puerto Rico commercial and recreational sectors, St. Thomas/St. John, St. Croix, and Caribbean-wide. If for any FMU in any year, the number of available days running from September 30th backward to the beginning of the year is not enough to achieve the required reduction in landings, then the additional days needed would be captured by extending the closure forward, beginning on October 1st and continuing for however many days are needed to fulfill the required reduction.

Alternative 3: Accountability measure-based closures resulting from an ACL overage will begin on January 1st of the closure year and extend forward into the year for the number of days necessary to achieve the required reduction in landing. This closure start date would apply to all FMUs for each of Puerto Rico commercial and recreational sectors, St. Thomas/St. John, St. Croix, and Caribbean-wide.

Alternative 4: Establish a fixed fishing closure start date for the implementation of AMs for each FMU by island/island group (A. Puerto Rico, B. St. Thomas/St. John, C. St. Croix, and D. Caribbean-wide). A different start date may be chosen for each FMU on each island/island group. The start date will begin on the last day of the identified month and go backward towards the beginning of the year. If for any FMU in any year, the number of days left in the year is not enough to achieve the required reduction in landings, then those additional days would be captured by extending the closure forward toward the end of the year.

A. Puerto Rico

I. Commercial:

Sub-Alternative 4a. Closure to start the last day of the month that has the highest landings based on the most recent three years of available landings data. (See Table 2.2.1 in the Draft Amendment for the specific date for each FMU [commercial]).

Sub-Alternative 4b. Closure to start the last day of the month with lowest landings based on the most recent three years of available landings data. (See Table 2.2.1 in the Draft Amendment for the specific date for each FMU [commercial]).

II. Recreational:

Sub-Alternative 4c. Closure to start the last day of the month that has the highest landings based on the most recent three years of available landings data. (See Table 2.2.2 in the Draft Amendment for the specific date for each FMU [recreational]).

Sub-Alternative 4d. Closure to start the last day of the month with lowest landings based on the most recent three years of available landings data. (See Table 2.2.2 in the Draft Amendment for the specific date for each FMU [recreational]).

B. St. Thomas/St. John, U.S. Virgin Islands (USVI) (Commercial and Recreational combined)

Sub-Alternative 4e. Closure to start the last day of the month that has the highest landings based on the most recent three years of available landings data. (See Table 2.2.3 in the Draft Amendment for the specific date for each FMU).

Sub-Alternative 4f. Closure to start the last day of the month with lowest landings based on the most recent three years of available landings data. (See Table 2.2.3 in the Draft Amendment for the specific date for each FMU).

C. St. Croix, USVI (Commercial and Recreational combined)

Sub-Alternative 4g. Closure to start the last day of the month that has the highest landings based on the most recent three years of available landings data. (See Table 2.2.4 in the Draft Amendment for the specific date for each FMU).

Sub-Alternative 4h. Closure to start the last day of the month with lowest landings based on the most recent three years of available landings data. (See Table 2.2.4 in the Draft Amendment for the specific date for each FMU).

D. Caribbean-Wide (Commercial and Recreational combined)

Sub-Alternative 4i. Closure to start the last day of the month that has the highest landings based on the most recent three years of available landings data. (See Table 2.2.5 in the Draft Amendment for the specific date for each FMU).

Sub-Alternative 4j. Closure to start the last day of the month with lowest landings based on the most recent three years of available landings data. (See Table 2.2.5 in the Draft Amendment for the specific date for each FMU).

Action 2: Specify a time period for revisiting the approach to establish AM-based closures selected in Action 1.

Alternative 1: No action. Do not specify how often the approach chosen should be revisited.

Preferred Alternative 2: Review the approach selected no longer than 2 years from implementation and every 2 years thereafter.

Alternative 3: Review the approach selected no longer than 5 years from implementation and every 5 years thereafter.
